General Description:

The Electro-Voice® Xi-1152A/64F is a second-generation loudspeaker system ideal for professional touring or installation applications requiring accurate, high-level sound reinforcement from a very compact enclosure. Because of the unique performance capabilities featured in this system, the X-Array Install™ Xi-1152A/64F offers extremely wide-range music reproduction as well as accurate vocal coverage and maximized intelligibility. The Xi-1152A/64F and associated controller combinations are recommended for applications requiring full bandwidth down to 44 Hz. Where very high levels of deep bass are required, maximum performance may be achieved with the addition of the Xi-1191A (single 18-inch subwoofer). The Xi-1152A/64F features an EVX155 15" transducer and an ND6-16 3" voice coil Neodymium driver on a 1.4" horn throat exit, providing extended frequency response with even, controlled coverage. This system has integrated L-track rigging for flying or arraying multiple enclosures.

Architectural & Engineering Specs:

The loudspeaker system shall be a two-way bi-amp system. The system shall have an 15-inch, low-frequency loudspeaker with a nominal impedance of 8 ohms and a 4-inch aluminum voice coil. The low-frequency driver shall have a power-handling capacity of 600 watts for 8 hours (as per ANSI/EIA RS-426 A & AES 2-1984). The high-frequency section shall employ a compression driver capable of handling 150 watts, 1,760- to 20,000-Hz when pink noise of a 6-dB crest factor is applied for 2 hours (as per AES 2-1984 and ANSI S4.26-1984 standards). The loudspeaker shall be constructed of 18-mm, 13-ply birch and shall be trapezoidal in shape. The wedge angle shall be 30-degrees. The grille shall be constructed from 16 GA powder-coated steel backed by acoustically transparent fabric. The system shall be capable of very-high level operation with a band width of 48 to 18,000 Hz. The system dimensions shall be 455 mm (17.90 inches) wide by 759 mm (29.88 inches) high by 414 mm (16.28 inches) deep. The system shall employ flying hardware of a "track" style, having two tracks on the enclosure top and two tracks on the enclosure bottom. The enclosure shall include a stand mount on the bottom of the enclosure. Net weight shall be 36.3 kg (80 lbs).

The loudspeaker shall be the Electro-Voice® Xi-1152A/64F.
